PROFILE

UX/UI and product designer with a foundation in graphic design and brand identity, currently completing a full-time Weiterbildung in UI/UX/AIX Design (until August 2026). I pair a trained visual eye for typography, layout and hierarchy with the full UX process: user research, personas, card sorting, information architecture, wireframing, prototyping and usability testing in Figma. Recent work ranges from a team-built, research-driven community website to solo, AI-assisted product builds. German citizen based in Essen; Arabic (native), German and English at B2.

CORE SKILLS

- UX/UI: user research, personas, card sorting, user flows, wireframing, prototyping, interaction design, information architecture, usability testing, design systems, responsive design, accessibility, AIX (AI experience design)
- Design tools: Figma (primary), Adobe XD, Photoshop, Illustrator, InDesign, After Effects, Premiere Pro, Lightroom
- AI-assisted build: turning Figma concepts into working web apps with Claude Code, Codex and Google AI Studio (React, three.js)
- Also: WordPress, Shopify, brand identity, motion, MS Office
- Languages: Arabic (native), German (B2), English (B2)

SELECTED PROJECTS

Design Circle Community · Mental-Health Web Platform for Creatives

Figma · WordPress · Team

Team project taken end to end: user research, personas, card sorting, information architecture, wireframes, an interactive Figma prototype, usability testing and an accessibility check, then built in WordPress. A community space for creatives focused on mental health and peer exchange.

Authoria · AI Companion for Novelists

Figma · Claude Code · Codex

A working writing app whose AI agents read the whole manuscript and surface story gaps but never write a word; they only ask questions, drawn from craft methodologies and literary masters (Balzac, Proust, Dickens). Designed in Figma and built with AI coding tools, so the author's voice stays entirely their own.

Burj Khalifa · Interactive 3D Web Experience

Figma · React · three.js

A scroll-controlled descent of the Burj Khalifa around a ready-made 3D model: I designed the journey and interaction, then built and deployed it solo with AI coding tools (React, three.js). Live at burj-wedge.vercel.app

EXPERIENCE

Graphic & Visual Designer · Mikati Bau und Konstruktion + Freelance

2017–2020

Beirut, Lebanon

- Produced architectural visualizations, brochures, marketing materials and clear, structured layouts for construction projects.
- Developed brand identities and logos for small businesses and designed social-media content; grew client social engagement by around 30%.

Relocation & Professional Integration

2023–2026

Germany

- Achieved German language certification to B2 (AWO & WIPA, Essen).
- Held customer-facing and self-employed roles (hospitality; independent logistics) while integrating and reskilling in UX/UI design.
- Built a UX/product portfolio spanning a team research project and solo AI-assisted builds: mikati-portfolio.vercel.app

EDUCATION & TRAINING

Weiterbildung UI/UX/AIX Design (full-time)

04/2026–08/2026

cimdata Bildungsakademie, Germany · in progress, completion expected 18 August 2026
